

Cost-Share Schedule

Purpose

This schedule states each plan's cost-sharing terms: monthly premium, individual deductible, individual out-of-pocket maximum, coinsurance after deductible, and flat copays for primary care and specialist visits. These are the authoritative figures for the co-pay calculator; no other document should restate them with different numbers.

Plan	Tier	Monthly Premium	Deductible (Individual)	OOP Max (Individual)	Coinsurance	Specialist Copay	Primary Care Copay
---	---	---	---	---	---	---	---
Silver Access 100 (PLN-SILVER-100)	Silver	\$310/mo	\$2500	\$7000	30%	\$45	\$25
Gold Complete 200 (PLN-GOLD-200)	Gold	\$460/mo	\$1200	\$5000	20%	\$35	\$15
Platinum Priority 300 (PLN-PLATINUM-300)	Platinum	\$640/mo	\$500	\$3000	10%	\$20	\$10

How cost-share is calculated

- Before the deductible is met, the member pays the full negotiated rate for non-preventive services.
- After the deductible is met, the member pays the coinsurance percentage of the negotiated rate, or the flat copay for a covered office visit, whichever the service category specifies.
- Once out-of-pocket spending reaches the plan's out-of-pocket maximum for the benefit year, the plan covers 100% of covered services for the remainder of the year.
- Specialist and primary care copays apply to the office visit itself; procedures performed during that visit are billed separately under coinsurance.
